

Time & Attendance Solutions for Mobile Workforces

Here at M-Set Technologies Ltd we are committed to helping our clients meet their workforce and asset monitoring requirements by delivering proven track and trace innovations.

We pride ourselves on satisfying the Time & Attendance monitoring requirements of hundreds of companies employing mobile workers across multiple sectors, including:

- Manned Security
- Cleaning Services
- Facilities Management
- Colleges & Universities
- Construction
- NHS Trusts
- Long Term Care
- Childcare

We're committed to supplying products of the highest quality, utilising the latest available technologies backed up with exceptional support.

Our short listing in the finals of the prestigious IFSEC Innovation Awards 2005 for best electronic product, would suggest that you don't even have to take our word for it.

...turn over to see how we do it

PES — The Only Employee Monitoring System in the World With Built in ANTI-Vandal™ Technology

The Portable Electronic Sensor (PES), based on respected Dallas iButton® technology offers a robust time and location device capable of monitoring employee movements at predetermined locations throughout a client site.

PES offers an element of control, ensuring that your employees are in the right place at the right time – a cast iron guarantee to your clients that sites are completely secured.

The sensor is a compact, easy to handle unit which is small enough to be held on a mobile worker’s key ring or vehicle key ring is and designed for ease of use.

An industry leading 5-year guarantee and 10-year battery life provides reliability and will ensure running costs are kept to an absolute minimum. What really sets the PES apart from conventional systems is its built in ANTI-Vandal™ technology.

Deliberate user-damage has been the downfall of similar systems in the past; causing problems with lost data and added costs but with an intelligent self protection system, not only is this sensor protected against damage by bored employees, it actually identifies which one tried to damage it.

The system can distinguish between levels of hit intensity, i.e. the cause being an accidental drop or by intentional forceful damage. It detects microwave attack, short circuit and high voltage. All the time the sensor will remain unaffected by the abuse with no reduction in the 10 year battery life.

Key Features

5 Year Warranty

10 Year Battery

Compact, easy to use

Full remote download

ANTI-Vandal™ Technology identifies -

- Small, Medium, Large Crash
- Microwave Attack
- High Voltage
- Short Circuit

PES Mini Sensor

- 200 event capacity
- 10 Year Battery
- 1 year Warranty

PES Forte Sensor

- 1000 event capacity
- 10 Year Battery
- 2 Year Warranty
- Mini Vandal Protection System

PES Profi Sensor

- 2000 event capacity
- 10 Year Battery
- 5 Year Warranty
- ANTI-Vandal Protection System

How The System Works

Step One

- The PES Sensor is assigned to a site or individual through the comprehensive WinKontrol software package.
- The employee is assigned a unique ID key ring and logs on by touching the unique ID key ring to the PES sensor.
- Location checkpoints are quickly and easily programmed through WinKontrol.
- The employee then fulfils the patrol or route as designated, by touching location checkpoints with the PES sensor.
- Any sabotage can be recorded and reported using the Incident Wallet which the employee touches with the PES Sensor to record different event types.

Step Two

- Once the patrol or round (series of patrols) is completed, data can be transferred to WinKontrol through the USB Adaptor or to a memory tag, usually held by the supervisor.
- One memory tag can hold up to 2000 readings before being downloaded via the USB adaptor. (No need for expensive mobile downloading cradles).
- Multi-sensor information is now downloaded to WinKontrol to analyse and generate a variety of reports - exception reports (missing checkpoints), vandal event reports, guard activity reports etc.

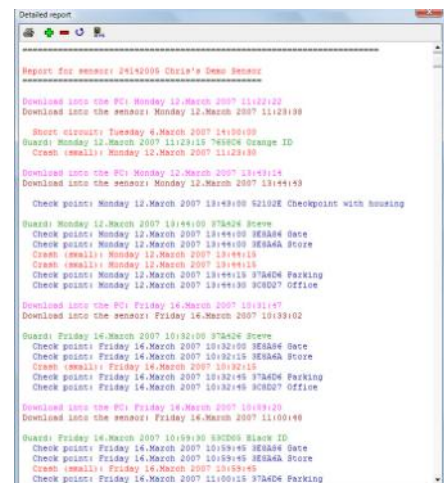

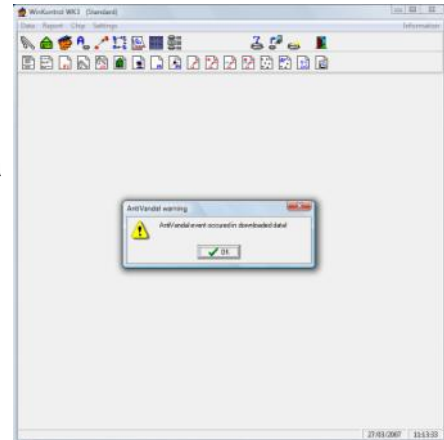

WinKontrol WK3 2007

WK2007 is a windows based software package designed to be the simplest to use Patrol Monitoring solution available in today's market. Whilst simplicity is the key, our expansive suite of reports help to maintain a professional image of your company to both prospective and existing clients. Reports can be printed, e-mailed to clients or simply stored on file for future quality assurance.

Over 15 reports comprise the WinKontrol suite, ranging from simple tour of duty information, through to individual guard reports. A small sample of the reports available are listed below:

- Individual site report by date
- Individual employee by date
- ANTI-Vandal report by employee
- ANTI-Vandal report by site
- Individual checkpoint report
- Full Exception reporting

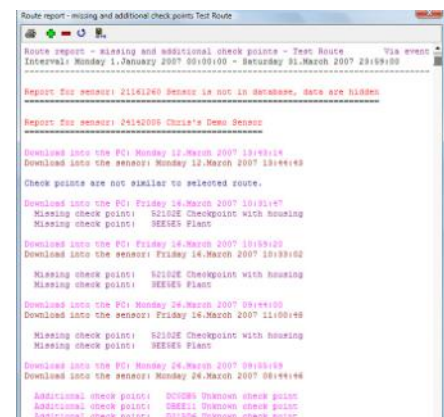

Standard or Professional Licence?

In order to provide a monitoring solution that fits all budgets and industries, WinKontrol 2007 has two versions; Standard and Professional. The functionality of the two versions is identical, the difference is the capacity of the system.

Standard is limited to; 2 PES Sensors / 10 employees / 50 Checkpoints.

Professional (enterprise) is a completely unlimited system.

(The option to upgrade from Standard to Professional can be provided by email).

Quick Starter “Tour in a Box”

We’ve realised that there are some occasions where your clients have asked you for patrol reports and you need a system installed fast. You may need additional sensors or checkpoints, and due to time constraints, may be able to give little notice of your requirements.

Here at M-Set we pride ourselves on being able to supply our clients with the equipment required to provide an exceptional patrol verification service, all with the minimum of fuss and with the minimum of notice.

Our Quick-Starter packages have been designed so that even the most die-hard of technophobes will feel confident in installing and using the system, in the quickest time possible. Valuable time can then be spent on developing the contractor-client relationship, as opposed to hours of frustration sat in front of a PC.

Full training services are available at your convenience, utilising the very latest in internet technology so that you receive the help when you need it.

Our Quick Starter Packs come ready to set up a patrol and include the following;

- 1 x Chosen PES Sensor
- 1 x Chosen WK3 2007 Licence
- 1 x USB 2.0 Downloader/Adapter
- 20 x Dallas iButton Checkpoints with toughened mounting
- 2 x Employee ID Tags
- 2 x Supervisor’s Download Tag
- 12 Months Support

Lease the complete system from as little as £5 per Week

So that you can provide the same exceptional level of tour monitoring services to all your clients without having to spend company capital reserves on equipment, we’ve teamed up with a leading financial services provider that specialises in leasing to the security sector.

Key benefits of choosing leasing over outright purchase:

- There is NO capital outlay
- The rental is FIXED through the term
- Rentals are fully TAX DEDUCTIBLE
- The leased system can be UPGRADED
- It makes the PES System very AFFORDABLE!

Industry leading Manufacturers Warranty - with a free loan unit!

PES Sensors are possibly, if not the most robust tour monitoring systems in the world, however even the toughest of units has a breaking point somewhere. That's why we've applied an industry leading 5 year warranty to protect your investment.

In the unlikely event that your PES Sensor should stop working, all you need to do is contact our support team to report the problem. We will then attempt to resolve the issue immediately, if we can't we will immediately despatch a replacement once we receive the damaged sensor. This allows you to continue to provide the same exceptional patrol service, thus protecting your contractor-client relationship.

We can even run the PES unit through a series of diagnostic tests in order to determine the root cause. Once the cause has been ascertained we can supply a full report in order to explain the reason for the malfunction.

We offer a 5 year hardware warranty which is the leading industry warranty for a patrol sensor - no other company in the world offers such a guarantee of quality.

If you'd like to read more about us, please visit our website www.mset.co.uk - here you can view all our products, more information about them and see testimonials from some of our current clients. We supply thousands of sites throughout the UK and we're proud to be able to say that we deal with the some of the largest guarding companies, facilities management companies, construction conglomerates, NHS Trusts, Universities and Colleges in the UK.

**5 Year
Warranty**

10 Reasons to buy the PES System

ANTI-Vandal™ technology

PES Sensors are amongst the most robust Guard Patrol systems in the world, and are the only devices that can tell you who tried to damage the hardware. This significantly reduces wanton damage.

Industry leading 5 year warranty

Say goodbye to expensive repairs, and loss of patrol information.

10 year battery life

No more excuses that patrol information cannot be presented to important clients,
“...because the battery ran out”.

Professional report generation

Our expansive suite of reports help to maintain a professional image of your company to both prospective and existing clients. Reports can be printed, e-mailed to clients or simply stored on file for future quality assurance.

Ergonomic design

With a weight of only 44g, and a length of just 90mm, our sensors are revered for their good looks and handy size, with no compromise on quality.

Extensive product range

Wide range available to suit application and budget of any size.

Based on respected Dallas iButton® technology

iButton® applications are utilised by some of the largest organisations in the world with Authorised Solution Developers constantly breaking boundaries with new innovations.

Tried and tested

PES guard tour systems have been tested alongside every competing product on the market by security and armed personnel all over Europe. The PES System is still going long after all the others have failed!

Free upgrades available

We regularly update all our sites with the latest features, modifications and technological platforms, so you'll never have to invest in another guard tour system again. We have an open policy with regards to product improvement, and welcome any feedback given.

It's The Best!

Widely acknowledged by Dallas Semiconductors (manufacturers of iButton®) as being one of, if not the best guard tour systems available in today's market.
