- 1 x USB 2.0 Data Downloader/Adapter
- 20 x Dallas iButton Checkpoints with toughened mounting
- 2 x Employee ID Tags
- 2 x Supervisor's Download Tag
- 12 Months Support

Which 'Tour in a Box' Fits?

Select - a Standard or Professional Licence;

In order to provide a patrol monitoring solution that fits all budgets, sites and industries, WinKontrol WK3 2007 has two versions; *Standard* and *Professional*. The functionality and reporting of the two versions is identical, the difference is the hardware capacity of the system.

Standard is limited to; 2 PES Sensors / 10 employees / 50 Checkpoints / 1 Event Pad.

Professional is a completely unlimited system.

(The option to upgrade from Standard to Professional can quickly be provided by email if any of the limitations are reached).

Then select - a PES Sensor;

The main difference is the event capacity of the sensor, take into account the number of events (i.e. checkpoints/guards/incidents) that each PES Patrol sensor has to retain before being downloaded into the PC or data tag. For example, if there are 25 checkpoints and 10 patrols per day downloaded once per week, $25 \times 10 \times 7 = 1750$, therefore the PES Profi is selected as it has a 2000 event capacity.

Now select accessories not already included in the Tour in a Box;

Extra PES Sensors, checkpoints, Incident wallets and Employee ID Tags.

Anti Vandal System	PES Mini Sensor	PES Forte Sensor	PES Profi Sensor
Indicates that an attempt has been made at damaging the PES sensor, Anti Vandal defines the type and severity of damage (3 levels of shock, high voltage, microwave and short circuit).	<ul style="list-style-type: none"> • 200 event capacity • 10 Year Battery • 1 year Warranty • ANTI-Vandal Protection System 	<ul style="list-style-type: none"> • 1000 event capacity • 10 Year Battery • 2 Year Warranty • ANTI-Vandal Protection System 	<ul style="list-style-type: none"> • 2000 or 10000 event capacity • 10 Year Battery • 5 Year Warranty • ANTI-Vandal Protection System
